SUMMARY

Full Stack Developer with 1.5 years of experience building DueDeck, a practice management platform for accounting and tax firms, using React.js, Node.js, Express.js, and MySQL. Integrated third-party GST APIs, built RESTful APIs and MySQL schemas, and developed form validation across 15+ forms. Seeking a full stack developer role at a startup.

SKILLS

- **Frontend:** React.js, JavaScript (ES6+), TypeScript (basic), HTML5, CSS3, Bootstrap, Custom Hooks, Responsive Design
- **Backend & API Technologies:** Node.js, Express.js, PHP, Laravel, RESTful APIs, JSON, Third-Party API Integration
- **Database:** MySQL, SQL, Schema Design, CRUD Operations
- **Cloud:** AWS (EC2, S3, IAM, VPC), Vercel
- **Tools:** Git, GitHub, Postman, Jira, Figma, Webpack, NPM, VS Code
- **Practices:** Data Structures, Agile/Scrum, SDLC, Unit Testing, UAT

EXPERIENCE

Software Developer | Eligo Apptech Pvt Ltd | Jan 2024 – May 2025

DueDeck is a practice management platform used by accounting and tax firms to manage clients, tasks, GST workflows, and reports.

- Integrated third-party GST APIs with Node.js and Express.js to validate GSTINs and auto-fetch business details, cutting manual client data entry time by 40% for 150+ clients.
- Designed relational MySQL tables with foreign keys and constraints to maintain accurate, consistent records for 150 clients across 20+ firms.
- Built RESTful APIs and designed MySQL schemas for Task Management, GST, Reports, Client Management, and Testimonials modules, keeping average API response under 300 ms.
- Developed client-side and server-side form validation across 15+ forms, reducing invalid submissions and data-entry errors by 60% across the application.
- Built responsive React.js interfaces with Bootstrap for 5 core modules, reducing the time to update client records by 30%.
- Debugged validation and database issues in an Agile team of 8–9 using Git and Jira, reducing reported production bugs by 35%. through systematic troubleshooting.

AWS Virtual Cloud Internship | AICTE/NEAT, supported by AWS Academy | Oct 2021 – Dec 2021

- Launched and configured EC2 instances inside a custom VPC with subnets and security groups to host a web application, completing hands-on deployment labs.
- Managed S3 buckets and IAM users, roles, and policies using least-privilege access to secure cloud resources.

PROJECTS

React AI Tool: AI-Powered Chat Application | Personal Project

Tech: React.js, JavaScript, Groq API, LocalStorage, Markdown, Vercel

Live Demo: https://react-ai-tool-using-groq-api.vercel.app/ | GitHub: github.com/harsha21042/React-Ai-Tool-using-GroqAPI.git

- Built a responsive AI chat application in React.js, integrating the Groq API with asynchronous requests and error handling to manage failed calls gracefully.
- Created reusable React components and custom hooks to organize chat logic and simplify state management.
- Implemented chat management (create, rename, delete, auto-titles from the first message) with LocalStorage persistence so history survives page refreshes.
- Rendered AI responses with Markdown and syntax-highlighted code blocks in a sidebar-based UI with loading indicators, deployed on Vercel.

EDUCATION

B.E., Electronics and Telecommunication | Amrutvahini College of Engineering, Sangamner (Savitribai Phule Pune University)

Aug 2019 – May 2023

CGPA: 8.41

Languages: English, Marathi, Hindi, Japanese (learning)
